**KEEP OUT OF REACH OF CHILDREN  
SEE BACK PANEL FOR CAUTIONARY STATEMENTS**

**GREASE  
RELEASE**  
PENETRATES. EMULSIFIES. LIQUEFIES.

**GREASE RELEASE** industrial strength detergent is a unique blend of surfactants that penetrates and softens animal Fat, vegetable Oil, and Grease (FOG). Once **GREASE RELEASE** emulsifies the FOG it will not re-solidify. **GREASE RELEASE** also penetrates surfaces to slow future build up of FOG. **GREASE RELEASE** enhances preventative maintenance programs by coating surfaces with a grease repelling barrier making future cleaning simpler, easier, and more effective. When used daily to wash floors, **GREASE RELEASE** saves time and money by keeping drain and sewer systems flowing, free of grease build up.
